

Radix VISO device management platform - For interactive screens (IFP) and signage!

VISO MDM is designed to remotely and centrally manage interactive touch screens and other displays with/without embedded operating systems. Using VISO, you can manage your device fleet, wherever they are located, in your network and beyond.

Manage, maintain, remote control, configure, install software and more. Your interactive flat panels, signage screens, Smart TV, set top boxes, OPS devices and information kiosks will always be ready and optimized for its mission.

Main features

- Remote real-time screen control/view
- Screen sharing (one to many, many to one)
- Software distribution and updates
- OTA and firmware management
- Adjust settings (Brightness, volume, source etc.)
- Power management (shut down, power on)
- Policy enforcement with web and app filtering
- Kiosk modes for single/multipurpose usage
- Grouping and tagging
- Device-level usage history and reports
- Preconfigured workflows

And much more!

CTOUCH is a
Radix Authorized Solution Provider

Tailored for IFP management

Interactive screens installed in classrooms, meeting rooms and public locations need remote management. Radix VISO device management is tailored for managing devices in such scenarios with a unique set of tools and interface

Device administration

- Remote screen control with touch
- Device info: Model, IP, MAC, S/N, ID etc.
- Set lock-down kiosk modes
- Limit usage of selected applications
- White/black list applications and websites
- Tweak the look and feel of the OS
- Analyze usage patterns and insights
- Set power management schemes

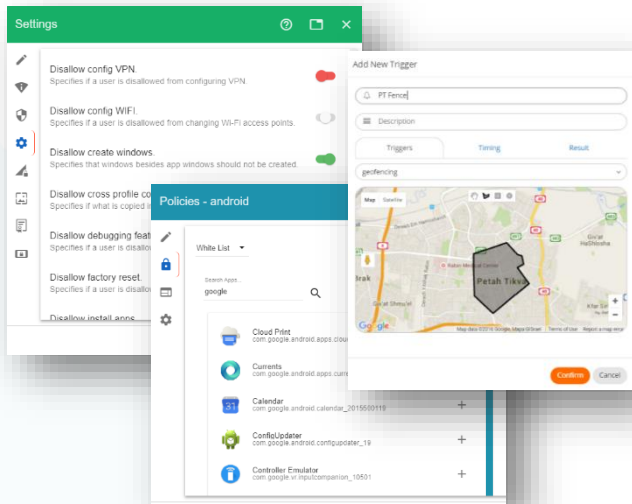

Firmware integration

- Integrate the MDM agent in your device firmware (factory preloaded)
- Zero-touch enrollment
- Enroll with Email/QR/Link
- SDK and API available for partners

Messaging and alerts module

- Send eye-catching messages and alerts
- Include images and sounds
- Send location based tailored messages
- Record and broadcast announcements
- Integrate with your existing technologies

Harnessing the power of our unique and intuitive tool set, along with the device OS capabilities, makes Radix VISO one of the most comprehensive, easy-to-use and robust device management solutions. VISO comes equipped with a powerful backend platform, lightning- fast communication layer and native integration with your device and with 3rd party technologies.

Start managing your screens with Radix VISO MDM
